

Web & mobile geo-hub that connects your GIS data to the non-GIS data in other systems in one single interface along with rich tools of 2D/3D web mapping, searching, analysis, reporting and data management. Using the smart permissions tools, you can link your users to their designated data.

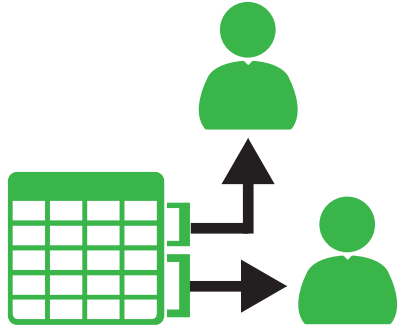

Mobilize & web enable your GIS data

- 📍 Web and mobile interface developed in HTML5 and Native mobile development.
- 📍 Bring your GIS data and its related data to the web.
- 📍 Mobile apps on the market.

Reporting as it has never been

- 📍 Design your own templates and print your data easily.
- 📍 Assign templates to data and users.
- 📍 Variety in templates and report designs.
- 📍 Smart reporting engine that automatically prints anything in the application in one single click.

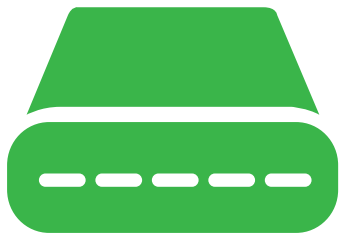

**Bring the right
information to the right
user**

- 📍 Authorize whoever you want to whatever you decide.
- 📍 Authorize tools and data to different departments.

Advanced GIS data management

- 📍 Data management is easier than you can imagine.
- 📍 Advanced data management to GIS & non-GIS data.
- 📍 Smart editing and snapping tools.
- 📍 CAD and ESRI files import & export.

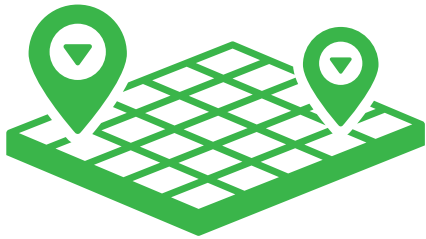

Geo-Hub for your GIS & non-GIS data

- 📍 One hub that connects your GIS data with its related relational information in other systems in one single interface
- 📍 Make use of PinHub tools in mapping, exploring, searching, analysis, reporting and management of your GIS & non-GIS data.

You will find what you want

- 📍 No way to miss something, PinHub provides Lots of searching tools.
- 📍 Simple tabular and spatial search.
- 📍 Combined and complex searches.

New 3D mapping experience

- 📍 Explore your GIS data in 2D, Oblique & 3D
- 📍 Utilize PinHub capabilities in fascinating performance in 3D web & mobile.

**It is time to have
your Geo-Hub, time
to use PinHub**
